LinkedIn: jones-malaravan-a | GitHub: jones3103

PROFESSIONAL SUMMARY

Mechanical Engineering undergraduate at Indra Ganesan College of Engineering (2025–2029).

Skilled in Python, C, and SQL, with an interest in applying programming to engineering challenges.

Familiar with embedded platforms and robotics components, including Jetson Nano and ESP32.

Knowledge of PCA9685 servo driver usage and IMU sensor integration for robotics applications.

Interested in robotics, artificial intelligence, machine learning, web development, and app development.

Motivated to build practical, innovative projects that connect hardware, software, and intelligent systems.

EDUCATION

B.E. – Mechanical Engineering | 2025–2029 (Ongoing)

Indra Ganesan College of Engineering

Higher Secondary – Computer Science Group | 2023–2025

Sacred Heart Higher Secondary School | 70%

TECHNICAL SKILLS

Programming Languages: Python, C, SQL

Embedded Systems & Robotics: Jetson Nano, ESP32, PCA9685 Servo Driver, IMU Sensor Integration

AI Development Tools: Google Antigravity, Claude

Areas of Interest: Robotics, Artificial Intelligence, Machine Learning, Web Development, App Development

FEATURED PROJECTS

Smart Campus Mobility System (EV Cart)

Worked on a smart electric campus transportation concept integrating an EV cart with RFID-based access, GPS tracking, battery monitoring, and a mobile application.

VR Campus Tour

Created an immersive virtual campus experience using 360-degree panoramic views and interactive hotspots to help students and visitors explore college locations.

Smart Agriculture Projects

Explored sensor- and embedded-system-based agricultural solutions focused on field monitoring and supporting smarter, technology-enabled farming operations.

CERTIFICATIONS & ACHIEVEMENTS

- **Nano Technology Workshop** – Certificate of Participation
- **100% Attendance** – Attendance Recognition
- **1st Prize** – Non-Technical Event
